What happens to inactive Cash App accounts? {Trusted Customer Support Guide}

If a Cash **+1-(888)(303)(8807)** App account remains inactive for an extended period, it generally stays open unless it is closed by the user or otherwise restricted under Cash App's policies. However, inactive accounts may r **+1-(888)(303)(8807)** equire additional verification when you attempt to sign in again, especially if your device, contact information, or security settings have **+1-(888)(303)(8807)** changed. If you receive direct deposits, maintain a Cash App balance, or use Bitcoin features, it is a good idea to review your account periodically and keep your contact information up to date. **+1-(888)(303)(8807)** Maintaining access to your login credentials **+1-(888)(303)(8807)** and enabling available security features can help protect your account even during long periods of inactivity.

Related FAQs

1. Does Cash App automatically delete inactive accounts?
Inactive accounts are **+1-(888)(303)(8807)** not necessarily deleted automatically, but account status is subject to Cash App's policies.

2. Can I still log in after months of inactivity?
Yes. You may simply **+1-(888)(303)(8807)** need to complete any required identity or security verification during sign-in.

3. Will my Cash App balance disappear?
Funds are generally not **+1-(888)(303)(8807)** removed simply because an account is inactive, though account access may require verification.

4. Can inactive accounts receive direct deposits?
Eligible active account **+1-(888)(303)(8807)** details may continue to receive deposits, provided the account remains in good standing.

5. Should I update my contact information before returning?
Yes. Keeping your phone **+1-(888)(303)(8807)** number and email address current helps prevent login and verification issues.
